

CURTIS AVIATION

At Curtis Aviation we believe that you should have fun with your flying, that's why we offer a variety of activities from Joyflights and Weekend Flyaways to Pilot Training from Student Pilot right through to Commercial Pilot level.

We have great aircraft, experienced instructors and a friendly atmosphere which all combine to make us one of the best places for you to fly.

JOYFLIGHTS

One of the best introductions to aviation and to the picturesque Southern Highlands is a Joyflight. We have several scenic flight routes available or you can plan your own. Some of our most popular routes are:

Route	Cost
Macarthur District	\$ 60.00
Burrangorang Valley	\$ 80.00
Wollongong	\$125.00
Southern Highlands	\$140.00
Sydney Harbour	\$180.00

These prices are per aircraft and may be shared between 3 passengers.

For the more adventurous we have Aerobatic joyflights in a Pitts Special open cockpit aeroplane. These flights will give you a different view of the local area - mainly upside down!

Pitts Aerobatic Joyflights start from \$85.00.

We can also arrange a tour of Yerranderie Village, formerly a thriving mining town located in the Burrangorang Valley. Our price includes transfers, a tour of the village, museum entry and bush style morning/afternoon tea. For only \$125.00 per person this tour is highly recommended.

PILOT TRAINING

Our flying school provides a high standard of instruction in a friendly atmosphere utilising a combination of ideal training aircraft. All aircraft are maintained to the Civil Aviation Authority standards and are among the best presented in the country.

Camden Aerodrome is suited to the role of flying training and private flying. It has two separate runways, experiences little delays due to air traffic congestion, is situated in the Sydney training area thus saving time and money, plus has CAA air traffic control services.

If you are considering learning to fly we recommend that you select Camden as the best training aerodrome and Curtis Aviation as your flying school.

Trial Instructional Flights are available for only \$50.00

AEROBATIC ENDORSEMENTS

Aerobatic training is conducted in our Bellanca Citabrias. The basic course includes:

Spinning, loops, wingovers, aileron and barrel rolls and stall turns. The course includes approximately 10 hours of dual instruction and 3 hours solo consolidation.

More advanced aerobatic training is conducted in our Pitts Special.

TAILWHEEL ENDORSEMENTS

Tailwheel training is generally conducted in the Bellanca Citabria, however we do have a Cessna 180 and a Maule M5-235 "Lunar Rocket" available for that little extra challenge. The average time to complete a tailwheel endorsement is 5 hours. This includes general handling, normal, shortfield, crosswind take off and landing and wheeler landings.

REFRESHER COURSES

If you have let your licence lapse or simply feel in the need of some fine tuning, we are able to tailor a course of training to get you back on top of it.

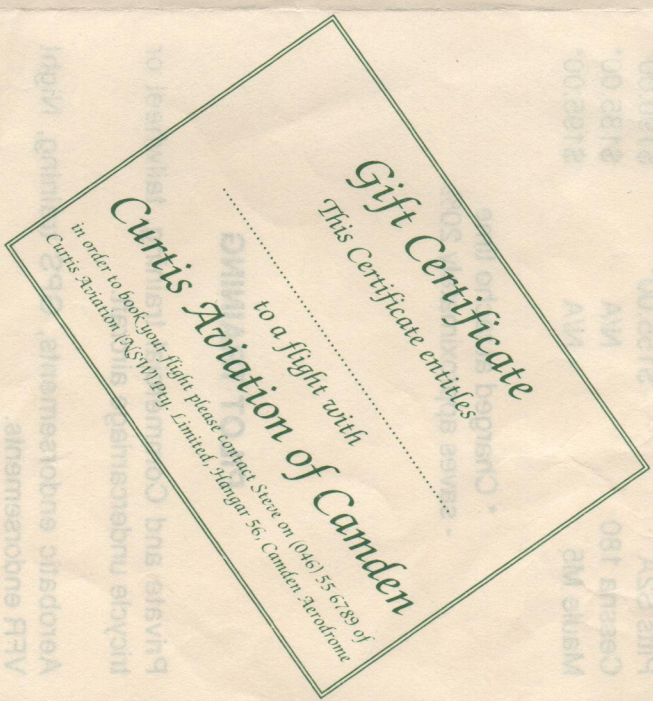

Did you know that if you held a licence in the past it is now valid and you only need to complete a medical and a Flight Review to exercise the licence privileges once again?

GIFT VOUCHERS

For a memorable gift why not purchase one of our Gift Vouchers?

Curtis Aviation Gift Vouchers are available for Aerobatic and Scenic Joyflights, Yerranderie Tours, Trips to Tugalong Station, Tailwheel and Trial Instructional Flights.

Prices start from only \$50.00
